
INVESTMENT RISKS

1| **Cryptocurrency Exchange**

- A| An exchange could become compromised during the time we are transferring money or placing a buy/sell order

2| **Cryptocurrency Market**

- A| It is not impossible for the entire market to lose massive volume or to endure a huge correction for a long period of time
- B| Altcoin markets are often dependent on a particular company or what a smaller community values it

3| **Cryptocurrency Legal**

- A| Government could pass laws that make it difficult to withdraw USD from selling cryptocurrencies

4| **Mining Risks**

- A| Although unlikely, power issues could render all mining rigs on a particular circuit useless

INVESTMENT STRATEGIES

1| **Diversify Funds**

- A| Any method could prove most profitable during a given time frame
- B| Mining requires physical labor and space -- can only handle so many mining rigs
- C| Active Trading has the highest potential, however it also has the highest risk
 - +Active Trading is not yet automated, so physical labor is required
 - +If done right, should return more profits than mining
- D| Passively invest remaining funds

2| **Withdraw Funds**

- A| If funds are needed, begin withdrawing as soon as possible -- it may take time to pull out a large sum
